

LongReach

Phantom

Victoria and South Australia

Now Free to Trade

Please complete the grower registration form - available from our Pacific Seeds Website

KEY FEATURES

- A mid to late maturity, competitive yielding variety that is similar in adaptability to Yitpi
- AH classification in the Southern Zone
- High yield potential in medium to higher yielding conditions
- Good Stripe rust resistance which adds significant security given the areas of susceptible varieties that are currently widely grown
- Useful level of CCN resistance (MS)
- Solid grain package with similar performance to Yitpi for sprouting and improved Black Point tolerance over Yitpi

BREEDING Pedigree: Yitpi/Sentinel

Phantom (LPB07-1040) was bred by Longreach Plant Breeders in Australia. This line has been extensively evaluated by the LongReach Plant Breeders since 2007. The line was first entered into National Variety Trials in 2010.

AGRONOMIC FEATURES

Phantom has a mid-late maturity similar to Yitpi and EGA Gregory. Phantom is suited to early planting in medium rainfall areas as well as being the ideal maturity for main plantings in medium to higher rainfall areas. Phantom has good early vigour, a very erect growth habit throughout the year and is medium tall in height like Yitpi. Standing ability is similar to Yitpi so can benefit from the application of growth regulants such as Moddus Evo in high production areas. Phantom has good stripe rust resistance (MR) but is susceptible to yellow leaf spot (S/VS) like Yitpi so is not suited to wheat on wheat situations. Phantom has medium to large grain size similar to Yitpi and Scout, an acceptable test weight and sound screenings. Good level of tolerance to Black Point (MR-MS) is a feature of the grain package as well as a useful level of pre Harvest Sprouting, similar to Yitpi.

Disease and Pest Resistance Ratings: Phantom and commercial varieties.

Variety	Disease Ratings							Pest Reaction		
	Stem Rust	Leaf Rust <small>p=provisional to new pathotype</small>	Stripe Rust	Stripe Rust	Septoria tritici	Crown Rot	Yellow Leaf Spot	CCN	RLN

PLANT BREEDERS RIGHTS

LongReach Phantom is protected by Plant Breeders Rights (PBR). In regard to propagating material (planting seed) of this variety, any unauthorised commercial production or reproduction, conditioning for propagation, offering for sale, sale, import, export or stocking of propagating material is an infringement under the Plant Breeders Rights Act 1994. Grower to grower trading of seed of LongReach Phantom is allowed.

End Point Royalty (EPR)

Each time a grower purchases seed of LongReach Phantom the grower agrees to comply with the Variety Licence and Royalty Agreement, including agreement to pay the EPR of \$3.80 per tonne (GST Excl). EPR is payable on all grain production, except on seed retained by the grower for replanting by the grower. The majority of the EPR will be paid by Advanta Seeds to the Breeder (LongReach Plant Breeders) for investment in future wheat breeding programs.
