

LONGREACH HELLFIRE

STATE: STHN NSW

FREE TO TRADE

Please complete the grower sales declaration form available from the Pacific Seeds website.

VARIETY ATTRIBUTES

A quick-mid Spring maturity for main season planting like Spitfire. 11% yield increase over LRPB Spitfire while maintaining similar protein accumulation.

Large grain, high protein and low screenings make LRPB Hellfire a standout grain package.

Premium quality profile with APH classification in NSW and Qld.

Solid disease package suitable for all main season growing areas in NSW and Qld.

Medium plant height and good standability.

AGRONOMIC BACKGROUND

LRPB Hellfire is a quick-mid spring maturing APH wheat with excellent yield performance and high protein accumulation. Quality testing during development in both the LongReach program and the NVT system has shown that LRPB Hellfire consistently produces protein levels similar to that of Spitfire, with high yields.

This feature makes LRPB Hellfire an important tool for growers looking to take advantage of stack averaging marketing opportunities, such as GrainCorp's Croptimise program, without sacrificing yield across the cropping program.

LRPB Hellfire shows excellent early vigour, solid resistance to stem and stripe rusts, good RLN tolerance, and good yield performance under the added stress of crown rot.

DISEASE RESISTANCE

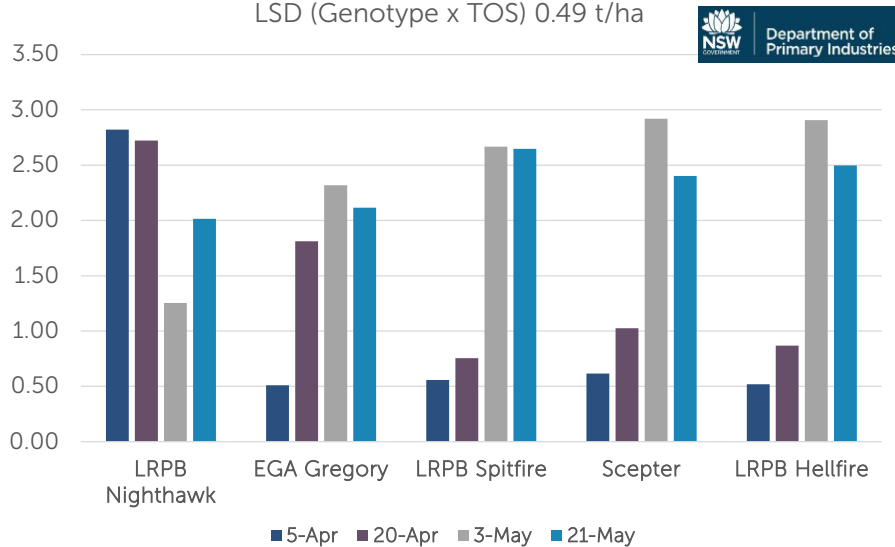

Stem Rust	MR
Leaf Rust	MSS
Stripe Rust East	MR
Yellow Spot	MSS
Septoria tritici	S
Crown Rot	MSS
Prat.thornei (Res)	MSS
Prat.thornei (Tol)	MI
Prat.neglectus (Res)	MSS
Prat.neglectus (Tol)	MTMI
Black Point	S

Longreach disease ratings have been compiled from LongReach disease screening data and from NVT disease ratings March 2024. Resistance ratings: VS=Very susceptible, S=Susceptible, MS=Moderately susceptible, MR=Moderately resistant, R=Resistant. Tolerance ratings: T=Tolerant, MT=Moderately tolerant, MI=Moderately intolerant, I=Intolerant, VI=Very intolerant. p=Preliminary data based on limited data set. #=may be more susceptible to alternative pathotypes.

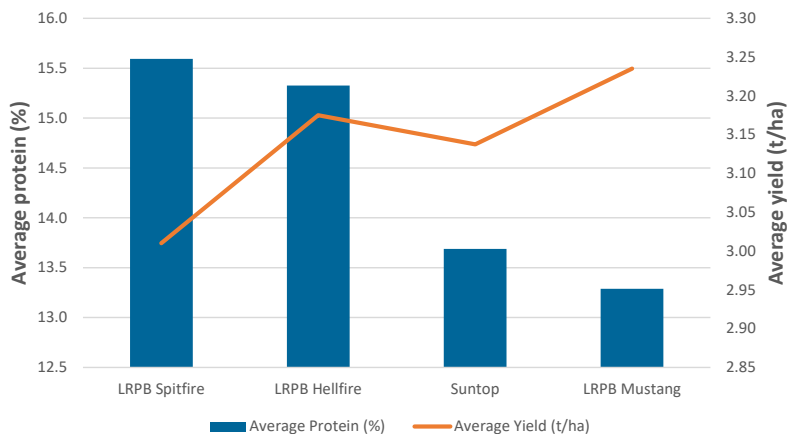

LONGREACH HELLFIRE

YIELD PERFORMANCE

NSW DPI time of seeding trial Wagga Wagga 2018
LSD (Genotype x TOS) 0.49 t/ha

2018-19 Sth NSW main season NVT
average yield and protein of selected APH varieties over 16 trials

PLANT BREEDERS RIGHTS

LongReach Hellfire is protected by Plant Breeders Rights (PBR). In regard to propagating material (planting seed) of this variety, any unauthorised commercial production or reproduction, conditioning for propagation, offering for sale, sale, import, export or stocking of propagating material is an infringement under the *Plant Breeders Rights Act 1994*. Grower to grower trading of seed of LongReach Hellfire is allowed.

End Point Royalty (EPR) Each time a grower purchases seed of LongReach Hellfire the grower agrees to comply with the Variety Licence and Royalty Agreement, including agreement to pay the EPR of \$4.25 per tonne (GST excl). EPR is payable on all grain production, except on seed retained by the grower for replanting by the grower. The majority of the EPR will be paid by Advanta Seeds to the Breeder (LongReach Plant Breeders) for investment in future wheat breeding programs.
