VARIETY ATTRIBUTES

A Quick-Mid Spring maturity for main season planting like Spitfire

11% yield increase over LRPB Spitfire while maintaining similar protein accumulation

Large grain, high protein and low screenings make LRPB Hellfire a standout grain package

Premium quality profile with APH classification in NSW and Qld

Solid disease package suitable for all main season growing areas in NSW and Qld

Medium plant height and good standability

AGRONOMIC FEATURES

LRPB Hellfire is a quick-mid spring maturing APH wheat with excellent yield performance and high protein accumulation. Quality testing during development in both the LongReach program and the NVT system has shown that LRPB Hellfire consistently produces protein levels similar to that of Spitfire, with high yields.

This feature makes LRPB Hellfire an important tool for growers looking to take advantage of stack averaging marketing opportunities, such as GrainCorp's Croptimise program, without sacrificing yield across the cropping program.

LRPB Hellfire shows excellent early vigour, solid resistance to Stem and Stripe rusts and good yield performance under the added stress of Crown Rot.

DISEASE RESISTANCE

Stem Rust		MR
Leaf Rust		MSS
Stripe Rust East		MR
Yellow Spot		MSS
Septoria tritici		S
Crown Rot		MSS
Prat.thornei	Res	MSS
Prat.thornei	Tol	MII
Prat.neglectus	Res	MSS
Prat.neglectus	Tol	TMT
Black Point		MSS

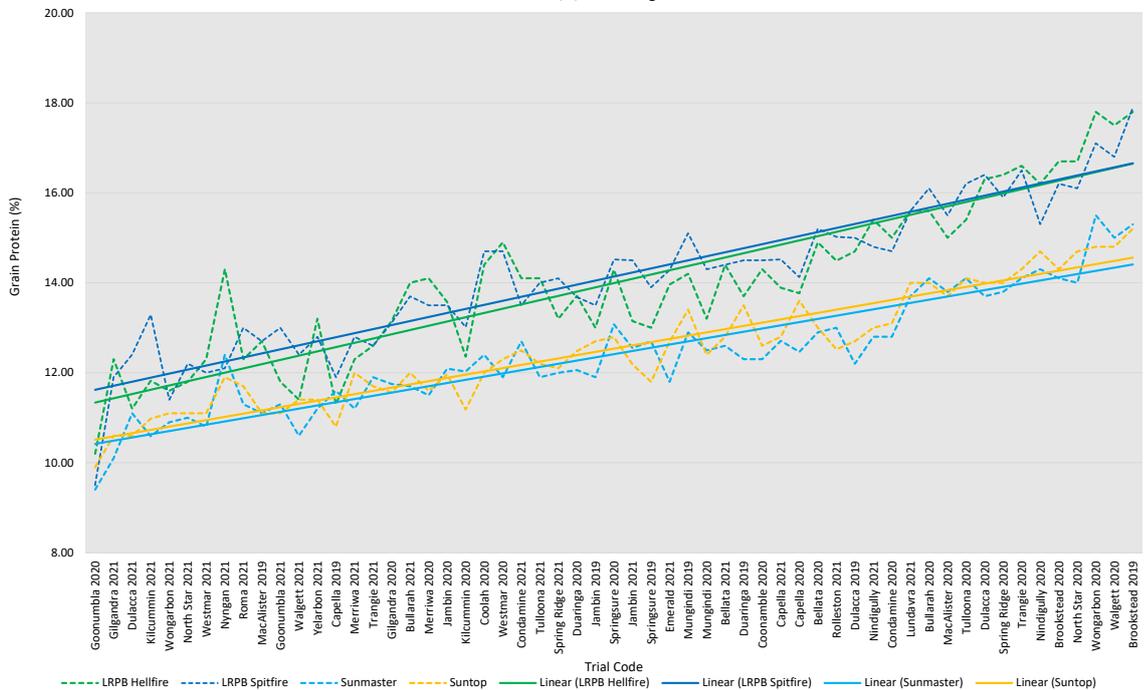

S=Moderately Susceptible, MR=Moderately Resistant
R =Resistant. Tol Rating - T=Tolerant, MT=Moderately Tolerant
MI=Moderately Intolerant, I=Intolerant, VI=Very Intolerant.
Varieties with # indicate susceptibility to pathotype variant.
Ratings with * indicate sourced from LRPB Disease Nurseries results. Data sourced via NVT (www.nvtonline.com.au) and LRPB Disease Screening Results Feb 2022. p=Preliminary Data Based on limited data set

YIELD PERFORMANCE

PLANT BREEDERS RIGHTS

LongReach Hellfire is protected by Plant Breeders Rights (PBR). In regard to propagating material (planting seed) of this variety, any unauthorised commercial production or reproduction, conditioning for propagation, offering for sale, sale, import, export or stocking of propagating material is an infringement under the Plant Breeders Rights Act 1994. Grower to grower trading of seed of LongReach Hellfire is allowed.

End Point Royalty (EPR)

Each time a grower purchases seed of LongReach Hellfire the grower agrees to comply with the Variety Licence and Royalty Agreement, including agreement to pay the EPR of \$4.25 per tonne (GST excl). EPR is payable on all grain production, except on seed retained by the grower for replanting by the grower. The majority of the EPR will be paid by Advanta Seeds to the Breeder (LongReach Plant Breeders) for investment in future wheat breeding programs.
