Pacific Seeds wheat varieties are protected by Plant Breeder Rights (PBR). In regard to propagating material (planting seed) of these varieties, any unauthorised commercial production or reproduction, conditioning for propagation, offering for sale, sale, import, export or stocking of propagating material is an infringement under the Plant Breeder Act 1994. End Point Royalties – Each time a grower purchases a Pacific Seeds wheat variety, the grower agrees to comply with the variety licence agreement, including agreement to pay the applicable EPR. EPR is payable on all grain production, except seed retained by the grower for replanting by the grower. The majority of the EPR will be paid by Pacific Seeds to the Breeder for investment in the future of wheat breeding programs.
