

## VARIETY ATTRIBUTES

A Slow Spring maturing variety suitable for Early to Mid season planting throughout NSW and QLD

High yielding variety showing stable yield performance across a wider sowing window

Secure disease and grain package suitable for all production environments across NSW and QLD

Moderate canopy for crop management with good standability

APH classification throughout NSW and QLD

## AGRONOMIC BACKGROUND

LRPB Raider is a LRPB Lancer/LRPB Reliant cross that was made in an effort to produce a shorter height LRPB Reliant type with an improved disease profile and increased tillering.

The result is a slow spring variety with the ability to quicken in cooler environments and seasons, while retaining LRPB Lancer's high tillering growth style and LRPB Reliant's ability to finish the season off fast. These attributes help give LRPB Raider greater flexibility in its sowing window without compromising on relative yield performance.

While LRPB Raiders maturity indicates it should produce optimum yield performance in early sown trials, the variety has demonstrated excellent yields across a range of sowing times and environments, producing consistent and competitive yields across trial sites even when planted later than ideal for the variety.

**PLANT BREEDERS RIGHTS**

LongReach Raider is protected by Plant Breeders Rights (PBR). In regard to propagating material (planting seed) of this variety, any unauthorised commercial production or reproduction, conditioning for propagation, offering for sale, sale, import, export or stocking of propagating material is an infringement under the Plant Breeders Rights Act 1994. Grower to grower trading of seed of LongReach Raider is allowed.

**End Point Royalty (EPR)**

Each time a grower purchases seed of LongReach Raider the grower agrees to comply with the Variety Licence and Royalty Agreement, including agreement to pay the EPR of \$4.25 per tonne (GST excl). EPR is payable on all grain production, except on seed retained by the grower for replanting by the grower. The majority of the EPR will be paid by Advanta Seeds to the Breeder (LongReach Plant Breeders) for investment in future wheat breeding programs.
